Date: Saturday, 4th December 2021

Venue: Hybrid Session

DoubleTree by Hilton Hotel, The Intermark, KL & Microsoft Teams

Time: 8.00am – 5.00pm

INTRODUCTION

Learning from COVID-19 - Improving Indoor Environment

The SARS-CoV-2 infection started in December 2019 and Malaysia experienced its first few cases on the 25 January 2020. Since then, we have learned a lot about the disease and how it spread. The realization that the SARS-CoV-2 spread by both droplets and air borne route have brought the need to have a health indoor environment in the forefront of our battle. What is a health indoor environment and what can we do to ensure that the environment that we work and live in are health? In this AOEMM Technical Update, we have invited experts from across the spectrum to share their view and experience. We have industrial hygienist, safety and health officer, environmental scientist, mechanical engineers, physicists, public health physician and innovation consultant who will be sharing their experiences.

WHO SHOULD ATTEND THE COURSE?

Occupational Health Physicians, Public Health Physicians, Occupational Health Doctors, Medical Specialists, Medical Practitioners, Occupational Health Nurses, Assistant Medical Officers and Safety & Health Officers.

CONTINUING PROFESSIONAL DEVELOPMENT (CPD) POINTS

- Malaysian Medical Association (MMA)
- Department of Occupational Safety and Health (DOSH)
