

Medical Surveillance 2-days Workshop

15-16 July 2023

8.00 am - 5.00 pm

DoubleTree by Hilton Hotel, KL

Academy of Occupational & Environmental Medicine, Malaysia

INTRODUCTION & OBJECTIVE

Medical surveillance is an important part of health risk management which involves collecting and using information about workers' health, in relation to the substances they use. It requires a systematic approach for the early detection of disease and follow up action to prevent disease progression. It is also essential to prevent further exposure to other workers.

This workshop will consist of lectures and case discussion sessions.

By the end of this workshop, participants will be able to:

1. Describe the fundamentals of medical surveillance and occupational toxicology
2. Outline and apply the important steps in conducting medical surveillance
3. Carry out medical surveillance reporting effectively
